Uitgangsvraag 3

Hoe kunnen cliënten, naasten en zorgverleners in de langdurige zorg het beste samenwerken om zelfmanagementondersteuning vorm te geven?

Onderliggende knelpunten

- Er wordt door naasten te weinig ervaren dat zij als gelijkwaardige worden gezien t.o.v. de zorgverlener en daarbij ook met respect worden benaderd.
- Naasten nemen vaak zorg over van cliënten in plaats van het bieden van zelfmanagementondersteuning. Dit is een lastige en ethische balans, die beïnvloed wordt door de soms progressieve factor van de ziekte en ziekte-inzicht van de cliënt. Hier komt ook (emotionele, financiële en fysieke) afhankelijkheid en macht bij kijken.
- Kennis over het samenwerken met naasten bij zelfmanagementondersteuning ontbreekt bij zorgverleners.

Method

Systematisch literatuuronderzoek. Vanuit de literatuur komen aandachtspunten naar voren om de samenwerking tussen cliënten, naasten en zorgverleners te verbeteren in de zelfmanagement-ondersteuning. Ook komt naar voren hoe zorgverleners om kunnen gaan met die aandachtspunten. Deze aandachtspunten worden mogelijk in procesevaluaties weergegeven. Er wordt gezocht naar alle soorten studie-artikelen.

Naasten: mensen die geen zorgprofessional zijn maar wel zorgen voor de cliënt, zoals familie, mantelzorgers, burens etc.

Zoekvragen

- Wat zijn belangrijke aandachtspunten in de samenwerking tussen cliënten, naasten en zorgverleners in de langdurige zorg ten aanzien van zelfmanagementondersteuning?

Uitkomstmaten

- Verbetering in/positieve samenwerking

Literatuurselectie

PICO	Uitwerking
P = Patient population / Clinical Problem	Mensen met een verstandelijke beperking en ouderen die gebruik maken van langdurige zorg
I = Intervention	Zelfmanagementondersteuning
C = Comparison	N.v.t.
O = Outcome	Samenwerking

Databases

Een literatuursearch zal worden uitgevoerd in 3 databases. De literatuurexpert zal deze naar eigen expertise kiezen en kiest uit: Pubmed (bevat Medline), Web of Science, Scopus, PsychInfo, Embase, Cinahl, Cochrane.

Zoekblokken

- "Ouderen" & "Mensen met een VB" & "Zorgverlener"
- "Zelfmanagement"
- "Samenwerking" (cooperation, collaboration, teamwork, partnership, patient participation, family participation, shared-decision making, triad, expectations, competencies)

De resultaten worden weergegeven apart voor ouderen en voor mensen met een VB.

Selectiecriteria

Exclusiecriteria
Type studies: dierstudies, protocollen, conference abstracts
Taal: Studies die niet Nederlands, Engels, Duits, Frans zijn.
Tijd: geen restrictie in eerste instantie
Artikelen gericht op samenwerking tussen zorgverleners onderling
Indien teveel hits: tijdrestrictie 25 jaar, of alleen zoeken op titel (i.p.v. titel en abstract)

Uit: Literatuurprotocollen richtlijn Zelfmanagementondersteuning_v9
